QUARTERLY JOURNAL
OF THE
Royal Meteorological Society

Editor
P. W. WHITE

Vol. 120, 1994

ROYAL METEOROLOGICAL SOCIETY
104 OXFORD ROAD,
READING, BERKSHIRE RG1 7LJ
Editorial

P. J. MASON—Large-eddy simulation: A critical review of the technique

A. L. M. GRANT—Wind profiles in the stable boundary layer, and the effect of low relief

SVEN-ERIK GRYNING and EKATERINA BATHVAROVA—Parametrization of the depth of the entrainment zone above the daytime mixed layer

G. J. SHUTTS, P. HEALEY and S. D. MOBBS—A multiple sounding technique for the study of gravity waves

J. A. BLOCKLEY and T. J. LYONS—Airflow over a two-dimensional escarpment: III: Non-hydrostatic flow

ZHIAN SUN and KEITH P. SHINE—Studies of the radiative properties of ice and mixed-phase clouds

NEIL R. GIMSON—Dispersion and removal of pollutants during the passage of an atmospheric frontal system

FILIPPO GIORGI, STEVEN W. HOSTETLER and CHRISTINE SHIELDS BRODEUR—Analysis of the surface hydrology in a regional climate model

HUI LIU, ENNIO TOSI and STEFANO TIBALDI—On the relationship between northern hemispheric weather regimes in wintertime and spring precipitation over China

M. J. BELL—Oscillations in the equatorial components of the atmosphere's angular momentum and torques on the earth's bulge

Notes and Correspondence

DAVID J. RAYMOND—Nonlinear balance on an equatorial beta plane

PETER R. JONAS—On the reflectance of cellular cloud layers

K. A. BROWNING and R. REYNOLDS—Diagnostic study of a narrow cold-frontal rainband and severe winds associated with a stratospheric intrusion

JOHN D. LOCATELLI, JONATHAN E. MARTIN and PETER V. HOBBS—A wide cold-frontal rainband and its relationship to frontal topography

V. KOTRONI, Y. LEMAITRE and M. PETITDIDIER—Dynamics of a low-level jet observed during the FRONTS 87 experiment

MELVILLE E. NICHOLLS and ROGER A. PIELKE—Thermal compression waves. I: Total-energy transfer

MELVILLE E. NICHOLLS and ROGER A. PIELKE—Thermal compression waves. II: Mass adjustment and vertical transfer of total energy

GLENN SHUTTS—The adjustment of a rotating, stratified fluid subject to localized sources of mass

KLAUS FRAEDRICH and CHRISTINE ZIEHMANN-SCHLUMBOHM—Predictability experiments with persistence forecasts in a red-noise atmosphere

ROBERTO BUZZA—Sensitivity of optimal unstable structures

D. J. LARY J. A. PYLE and G. CARVER—A three-dimensional model study of nitrogen oxides in the stratosphere

Notes and Correspondence

K. A. BROWNING—Survey of perceived priority issues in the parametrizations of cloud-related processes in GCMs
# TABLE OF CONTENTS

 ANTOON MEESTERS—Dependence of the energy balance of the Greenland ice sheet on climate change: Influence of katabatic wind and tundra ........................................... 491
 J.-L. REDERLSPERGER and J.-P. LAFORE—Non-hydrostatic simulations of a cold front observed during the FRONTS 87 experiment ......................................................... 519
 JOSEPH EGGER and HANS HATT—Passage of a frontal zone over a two-dimensional ridge .......................................................... 557
 ARTHUR L. RANGNO and PETER V. HOBBS—Ice particle concentrations and precipitation development in small continental cumuliform clouds ........................................ 573
 S. J. ENGLISH, C. GUILLOU, C. PRIGENT and D. C. JONES—Aircraft measurements of water vapour continuum absorption at millimetre wavelengths ........................................... 603
 MARTIN EHRENDORFER, MICHAEL HANTEL and YONG WANG—A variational modification algorithm for three-dimensional mass flux non-divergence ........................................... 655
 DAVID B. STEPHENSON—The northern hemisphere tropospheric response to changes in the gravity-wave drag scheme in a perpetual January GCM ........................................ 699
 CRAIG H. BISHOP and ALAN J. THORPE—Potential vorticity and the electrostatics analogy: Quasi-geostrophic theory ................................................................. 713
 Notes and Correspondence
 STEVEN B. FELDSTEIN and WALTER A. ROBINSON—Comments on ‘Spatial structure of ultra-low frequency variability of the flow in a simple atmospheric circulation model’ by I. N. James and P. M. James (October 1992, 118, 1211–1233) ....................................................... 739
 I. N. JAMES and P. M. JAMES—Reply to comments by S. B. Feldstein and W. A. Robinson on ‘Spatial structure of ultra-low frequency variability of the flow in a simple atmospheric circulation model’ (October 1992, 118, 1211–1233) ....................................................... 747

 P. N. FRANCIS, A. JONES, R. W. SAUNDERS, K. P. SHINE, A. SLINGO and ZHIAN SUN—An observational and theoretical study of the radiative properties of cirrus: Some results from ICE’89 ......................................................................................................................... 809
 B. J. MASON—The shapes of snow crystals—Fitness for purpose? ......................................................................................................................... 849

TABLE OF CONTENTS

DAVID J. RAYMOND—Convective processes and tropical atmospheric circulations 1431

A. R. BROWN, S. H. DERBYSHIRE and P. J. MASON—Large-eddy simulation of stable atmospheric boundary layers with a revised stochastic subgrid model 1485

K. LAGOUWARDOS and Y. LEMAITRE—Influence of strong gradients of wind and humidity on frontal ageostrophic circulations 1513

K. A. BROWNING and N. M. ROBERTS—Structure of a frontal cyclone 1535

D. R. JACKSON and L. J. GRAY—Simulation of the semi-annual oscillation of the equatorial middle atmosphere using the Extended UGAMP General Circulation Model 1559

D. R. JACKSON—Tides in the Extended UGAMP General Circulation Model 1589

L. FERRANTI, F. MOLTENI and T. N. PALMER—Impact of localized tropical and extratropical SST anomalies in ensembles of seasonal GCM integrations 1613

ROBERTO BUZZA—Localization of optimal perturbations using a projection operator 1647

Notes and Correspondence
D. J. LARY, M. BALLUCH and S. BEKKI—Solar heating after a volcanic eruption: The importance of SO₂ absorption 1683

JOSEPH EGGER—A new conservation law of the shallow-water equations 1689
